## About Us

**VISION 2K+ Inc**, as a vibrant enterprising organization, began its journey towards the world leadership in Medical transcription, Coding & Billing, Electronic Medical Records & Paperless Office System implementation and other Back-office services to the medical facilities. In the last seven years, we have grown with over 500 employees working in different shifts at our sister concern.

With the ongoing trends of information technology, where change is an obsession, time a limited commodity, and quality the hallmark of every business, we strive and stand a flowing stream creating our own path and letting others follow in the service of healthcare providers. In this metamorphose environment of the business scenario, VISION 2K is creating impressions on the sands of time, with the latest information technology. We believe it is imperative on our part to employ our professionalism and savoir-faire to develop and implement solutions in this field.

Our matchless services will allow the healthcare providers to have more free time for actual healthcare and also relieve them from labor shortages.
