About Us

Vulcan Industries was founded in 1971 in Mumbai, India. Initially Vulcan dealt with mud pumps & trading in drilling accessories. Meanwhile Vulcan also offered consulting services to various end users. It then graduated into manufacture of drilling accessories which made a mark for itself among the mining companies in India.

We shifted our base from Mumbai to Anand in 1985 with a vision to venture deeper into the manufacturing activities. Between late 80s & 90s the company saw a rapid growth rate in manufacturing facilities and the number of employees. As we introduced mining equipments spares and special industrial gearboxes, the number of employees multiplied.

Expansion

With time and requirement we set up our new unit in 2003. It catered to the requirements of standard industrial gear boxes & accessories. Within a span of four years another unit was set up at Sunav. It concentrated on the manufacture of mining replacement parts, sub-assemblies, fabricated components & special gear boxes.

Today

Today Vulcan is spread over three units of 20,000 sq meters constructed manufacturing area with state of the art manufacturing facilities covering its three divisions. Apart from the offices in India it also has its sales divisions in USA and South Africa. Vulcan has made its presence felt in various industries like Mining, Cement, Steel, Power, Material Handling, Sugar etc. Vulcan has also developed distribution network...
